PREFACE

The *Bermuda Digest of Statistics* was first produced in 1973. The publication provides an annual summary of various socio-economic statistics designed for convenient reference. The tables are grouped by theme to form a total of 10 sections. Unless otherwise stated, the statistics are for Bermuda.

The *2015 Digest of Statistics* contains brief analyses, quick facts and graphs for each section. The aim is to supplement each section of tables by identifying key facts and trends. The graphs serve as a quick way to determine trends in a visually appealing way.

The name of the department or organization whose reports or published statements were used is noted under each table. The assistance provided by these departments or organizations is acknowledged gratefully.

The figures in the Digest are mainly annual totals and totals for calendar months. Wherever possible, and space permitting, series have been provided for the period 2004 to 2014. Figures for earlier years may be found in previous editions of the Digest.

Melinda Williams
Director of Statistics

OVERVIEW

Note: Unless otherwise stated, facts and figures stated relate to 2014.

Section I – Population

A record low of 574 births was reached in 2014. In contrast, the 480 deaths captured were the highest of the 2004 to 2014 period. The 477 marriages recorded were well below the eleven-year average of 685. Finally, 104 divorces were granted, the lowest since 1984.

Section II – Education

The total school enrolment figure of 9,696 students has set another record low. Total enrolment has declined steadily since 2004 with the exception of slight increases in 2008 and 2009. Similarly, Government school enrolment has fallen year over year during the eleven-year period apart from in 2013. On the other hand, private school enrolment rose from 2005 to 2009 then fell annually thereafter. The number of Bermuda College students has declined for the past four years yet has remained above the period average of 1,079 students.

Section III - Health

The total number of sexually transmitted infections (STIs) reached its lowest levels since 1998. Persons aged 20-29 represented 47% of all STIs reported. Chlamydia remained the leading STI accounting for nearly three quarters of all cases. Although the number of STIs has decreased, the proportion of reported herpes cases has increased more than five-fold between 2007 and 2014.

Section IV - Labour

The total number of occupied jobs has declined each year since 2008, falling to a twenty-two year low in 2014. Service Workers, Shop and Market Sales Workers and Wholesale/ Retail Trade and Restaurants/ Hotels remained the leading occupational and industrial categories, respectively. Work permits issued to private sector employees dipped to under 10,000 for the first time since 1999.

Section V - Prices & Wages

Food and non-alcoholic beverage retail prices increased for two-thirds of the items captured over the past year. Sliced peaches, corn niblets and chicken legs had the largest percentage increases in prices whereas apples, salt and tomato soup had the largest percentage decreases.

Corned beef and cheese are the only two food items that have more than doubled in price over the past 10 years. Corned beef (12 oz.) was \$1.79 in 2005 and now costs \$4.15. Cheese (16 oz. block) was \$3.24 in 2005 and has increased to \$6.96. Although all 45 food and non-alcoholic beverage items have increased in price since 2005, imported boneless codfish, tea (50 bags) and coffee (12 oz. instant) had the smallest percentage increases in price, respectively.

Section VI - Home Finance

Government expenditure exceeded revenue by a record \$300 million in fiscal year 2014/15. Payroll tax was the largest contributor to Government revenue and wages and salaries were the largest component of expenditure.

The Corporation of Hamilton deficit of \$20 million was the largest it had been in the 2004 to 2014 period. This was largely due to the default on repayment of an \$18 million loan to Mexico Infrastructure Finance; the largest component of expenditure. Taxes were the largest revenue source for the Corporation of Hamilton.

In 2014/15, the Corporation of St. George recorded its largest surplus of the past eleven years at \$520,000. Government Transfers (Grants) and staff and office expenditures continued to be the largest sources of revenue and expenditure, respectively.

Section VII – External Trade

The value of the island's imports stood at \$962 million, below the eleven-year average of \$1,001 million. The leading commodity group imported has been Food, Beverages and Tobacco since 2012. Throughout the period, the majority of imports have arrived from the United States of America. The value of exports dropped to a record low of \$12 million mainly due to the decline in the value of musical instruments exported during the past year.

Section VIII - Transport

Total registered road vehicles continued to decline for the fifth consecutive year. The number of reported road traffic accidents reached a record low. Notably, the number of traffic accidents in 2014 was less than half the amount in 2007. Private cars, motorcycles and trucks continued to be the primary vehicles involved in these accidents. The main cause of traffic accidents has been 'inattention' for the past two decades. As with reported traffic accidents, a record low for the number of road casualties was recorded. However, after three consecutive years of 9 traffic fatalities between 2011 and 2013, the total increased to 16 fatalities, mainly involving motorcycles.

Public passenger journeys have increased by 9% in the past year to 3.0 million but still remained well below the 3.5 million average for the period. The number of charter passenger journeys declined by 60% between 2013 and 2014, dipping to under 10,000 for the first time.

Section IX - Visitor Arrivals

Total visitor arrivals were near the average for the past eleven years. Nearly half of all visitors arrived between June and August. Air arrivals accounted for 39% of total arrivals, down from 57% in 2004. This shift can be attributed to air arrivals being the lowest since 1966. Residents from the United States of America represented more than seven of every ten air arrivals, with New York residents comprising 15% of all air arrivals.

Section X - Miscellaneous

The values of fruit and honey production were at their lowest within the past decade. The value of vegetable production was nearly \$300,000 below the ten-year average.

In 2014/15, the total number of telephone subscribers was the lowest since 1989/90. Furthermore, the number of residential and commercial telephone subscribers each declined every year in the past eleven years. This is likely a result of a shift towards using cellular devices to replace traditional landlines.

Applications for planning permission were less than half the amount in 2004. The number of completed dwelling units has also dropped considerably over time, as 2014's low represented one-third of the number completed in 2004.

Section I

Population

2014 Quick Facts

- Total births: 574
- Total deaths: 480
- Total marriages: 477
- Total divorces: 104

¹In 2002, the 'Best Steps Programme' was discontinued; it later resumed in 2007.

Source: Bermuda College

²The 'Nursing Programme' was launched in 2012.

³Free tuition was implemented, for Bermudian students, by the Bermuda Government in September 2008.

⁴In September 2011, the free tuition scheme was revoked and replaced with a 50% tuition discount.

¹These are work permits issued to Non-Bermudians who are not married to Bermudians.

Source: Department of Immigration

²A new policy restricting short-term work permits caused a shift from short-term to long-term work permits.

³The majority are one-year renewal permits.

⁴The totals include work permits in the year that they are first issued but are not reflected

in subsequent years, even though their validity may be spread over multiple years.

¹The minimum weekly rate is shown for selected workers or a group of workers with roughly equivalent levels of pay.

Source: Bermuda Industrial Union - Collective Agreements

²Includes: electricians, fitters, masons, painters, panel beaters,

plumbers, mechanics and welders.

³Air Services was discontinued in 2010.

⁴Collection of weekly pay rates from Renaissance Aviation began in 2014.

²Conservation Areas and Protection Areas overlay
Development Zones and Conservation Zones.

NOTES:

Residential I: higher density residential development; commercial, industrial,
etc. use may be permitted provided there is no loss of residential amenity.

Residential 2: lower density housing. Other uses are restricted.

Rural: tracts of open countryside and areas of rural character where very limited
new development may be permitted.
