1. INTRODUCTION

1.1 SECURITY CLASSIFICATION

This document is marked as **UNCLASSIFIED** as there are no sensitive details contained in it and it is expressly written to be circulated both internally and externally.

1.2 DATA INTEGRITY

The statistics, tables and graphs contained in this document are based on substantiated cases, which are active investigations of an incident that has definitely happened. This is as opposed to using incident data, which is an initial recording of a crime that has yet to be substantiated.

While every effort is made to ensure that the information contained in this report is accurate, the BPS makes no warranty, representation or guarantee as to the content, sequence, accuracy, timeliness or completeness of any data or information provided. The reader of the following pages should not rely on the data provided for comparison purposes over time, or for any reason. The BPS shall assume no liability for any errors, omissions, or inaccuracies in the information provided. The BPS will not be responsible for the use of, or the results obtained from the use of this document. The BPS assumes no liability for any decisions made or actions taken or not taken by the user in reliance of this document. Any use of the document for commercial purposes is prohibited.

1.3 EXPLANATION OF GRAPHS

The graphs used in this report include standard deviation, which has been used as a means of objectively measuring how much the crime rate has varied over time and is useful in identifying extreme highs and lows of crime. Standard deviation has been used so that where the crime rate is above the red line (2 standard deviation above the mean average), it is considered exceptionally high. Where the crime rate is below the blue line (2 standard deviation below the mean average), it is considered exceptionally low. In both cases it can be referred to as statistically significant (high or low) and is an indication of whether the quarterly statistics are exceptionally high or exceptionally low.

1.4 AIM

The aim of this report is to produce accurate, timely, objective information that:

- Enables informed decisions to be made on the types of crime that threaten the safety of the community.
- Is used to proactively manage risks to the island and ensure effective policing, redeploying and directing resources at a strategic and tactical level, as required.
- Facilitates effective and open communication with our stakeholders, developing the means to inform them of the plans, efforts and progress being made by the BPS.
- Provides meaningful information as one of the means of reassuring communities in Bermuda.

2.2 TRENDS

All crime in Q4 2011 is the 7th lowest quarterly crime figure since Q1 2000. There were an **average of 84 offences a week in 2011 compared to 104 offences a week in 2007**, reinforcing the view that the **long term trend of all crime in Bermuda is decreasing**. This can be seen in Figure 4, which shows crime for the last 20 quarters, with Q4 figures highlighted in boxes:

Figure 4: All Crime By Quarters (Q1 2007 - Q4 2011)

3. CRIMES AGAINST THE PERSON

3.1 SUMMARY

3.2. TRENDS

Despite an increase in Q4 2011, caused by an increase in Other Assaults, the **10.3%** year on year decrease, reinforces the view that **the long term trend of Crimes Against The Person is decreasing**. A summary of Crimes Against The Person for the last 20 quarters can be seen in Figure 7, with Q4 figures highlighted in boxes:

Figure 7: Crimes Against the Person By Quarters (Q1 2007 - Q4 2011)

4. FIREARM INCIDENTS

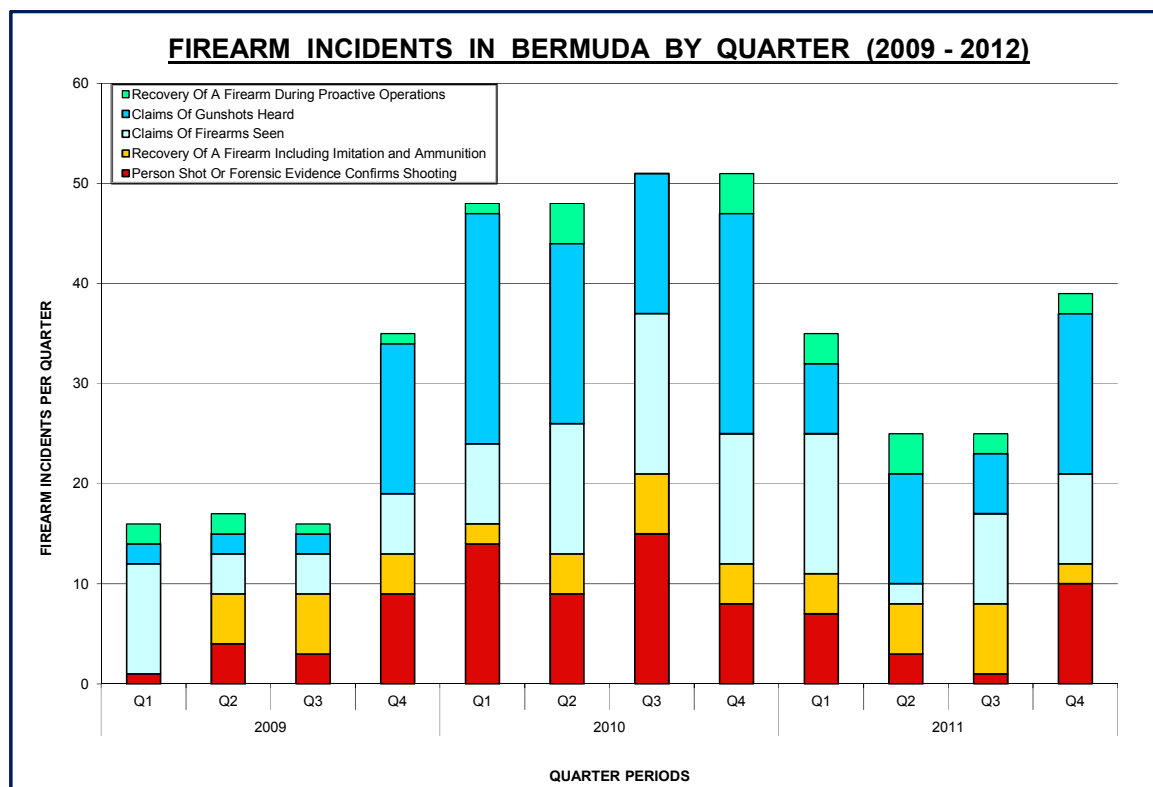

Firearm Offences are included within Crimes Against The Community (Section 5); however firearm incidents¹ may not necessarily be recorded as offences, as often there is no suspect or even a victim.

4.1 SUMMARY

In Q4 2011 there were **39** firearm incidents of which **14** were confirmed firearm incidents and **25** were unconfirmed firearm incidents. This compares to **10** confirmed firearm incidents and **15** unconfirmed firearm incidents in Q3 2011 and **16** confirmed firearm incidents and **35** unconfirmed firearm incidents in Q4 2010.

There was a substantial decrease in year on year firearm incidents with **124** in 2011 compared to **198** in 2010, with the largest decrease in unconfirmed firearms incidents. There were **50** forensically confirmed firearm incidents in 2011 compared to **71** in 2010 and **38** in 2009. This can be seen in Figure 8, which shows firearm incidents between 2009 and 2011:

Figure 8: Firearm Incidents In Bermuda By Quarter (2009 - 2011)

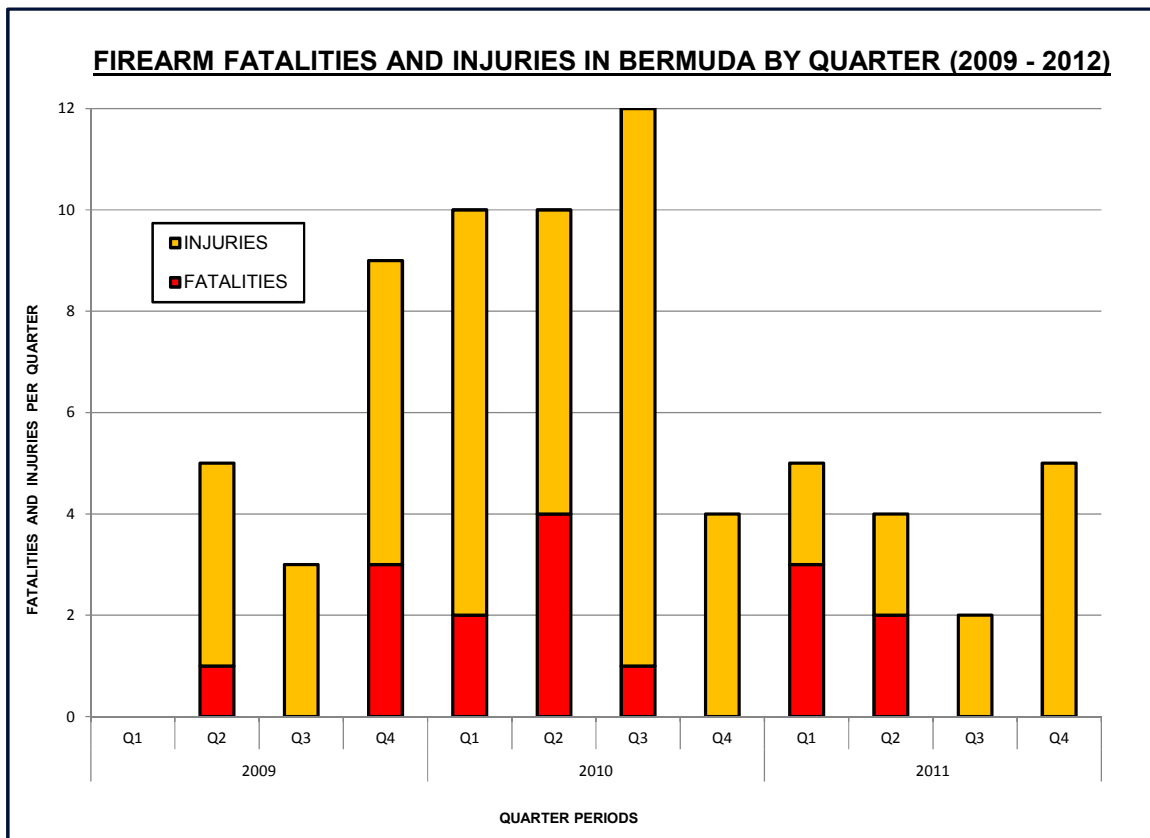

¹ To enable accurate recording, analysis and reporting of firearm incidents, the BPS classifies firearm incidents into 5 categories which are split into either **confirmed** or **unconfirmed** categories. A confirmed incident is where forensic evidence proves the incident occurred e.g. a firearm has been seized, shell casings or bullets are recovered, or a person has a gunshot wound. **Person Shot or Forensic Evidence Confirms Shooting**, **Recovery of A Firearm Including Imitation and Ammunition** and **Recovery Of A firearm During Proactive Operation** are classified as **Confirmed**, while **Claims of Firearms Seen** and **Claims Of Gunshots Heard** are classified as **Unconfirmed**.

4.2 FIREARM TRENDS

The **50** confirmed firearm incidents in 2011 included the recovery of **10** firearms. In comparison, there were **7** firearms recovered in 2010 and **1** firearm recovered in 2009.

There were **5** fatalities and **11** injuries by firearms in 2011. This compares to **7** fatalities and **29** injuries by firearms in 2010 and **4** fatalities and **13** injuries by firearms in 2009. This brings the total number of persons shot since the dramatic increase of firearm incidents in 2009 to 2011 to **69**, **16** of which have been fatal shootings. Figure 9 shows firearm fatalities and injuries from Q1 2009 to Q4 2011:

The Bermuda Police Service continues to work with its partners both locally and overseas to disrupt the trafficking of controlled drugs. These partners include HM Customs Bermuda, U.S. Customs and the U.S. Drug Enforcement Administration. Despite these partnerships, controlled drugs are still entering Bermuda which is evidenced in the number of 'street' level drug seizures. This can be seen in Figure 22, which shows Drug Seizures in Bermuda by Location, by quarter:

Figure 23: Drug Seizures In Bermuda By Location, By Quarter

	OVERSEAS	PORT	STREET	TOTAL
Q1 2011	12	28	199	239
