## PREFACE

The *Bermuda Digest of Statistics* was first produced in 1973. The publication provides an annual summary of various socioeconomic statistics designed for convenient reference. The tables are grouped by theme to form a total of 13 sections. Unless otherwise stated, the statistics are for Bermuda. Some tables from the previous edition have been removed because the data is no longer collected or is now in a different format. Similarly, tables have been modified/ added to this edition to enhance the variety of data provided.

The name of the department or organization whose reports or published statements were used is noted under each table. The assistance provided by these organizations is acknowledged gratefully.

The figures in the Digest are mainly annual totals and totals for calendar months. Wherever possible, and space permitting, series have been provided for the period 2000 to 2010. Figures for earlier years may be found in previous editions of the Digest.

<sup>2</sup> As of 2009, the tetanus and diphtheria vaccine includes pertussis.<sup>3</sup> The fall in cases is due to the change from the use of Gamma Globulin to Havrix as the vaccine of choice in protection against Hepatitis A.

<sup>1</sup>All rates are quoted as of October 1st of each year, with the exception of the Teachers whose rates are adjusted 1st September of each year.

<sup>2</sup>This sector comprises a broad range of occupations which include administrative, professional, technical and clerical workers as well as public health nurses and customs officers. The brief descriptions of each grade range attempt to give only a general idea of the job types involved. Users should also note that pay grades attached to some positions may overlap at the margins.

<sup>3</sup>Teachers and lecturers are placed on the scale according to their qualifications and experience, for nursery, primary, middle and secondary teachers, school size is an additional criterion.
