## BALANCE OF PAYMENTS & INTERNATIONAL INVESTMENT POSITION

FOR THE QUARTER ENDED MARCH 2012

## FAST FACTS

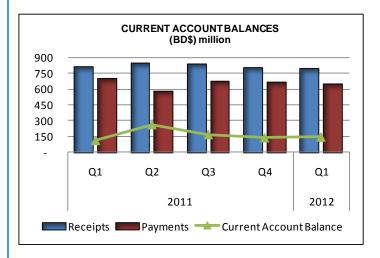

## **Current Account**

The Bermuda current account recorded a surplus of \$145 million in the first quarter of 2012.

§ The goods trade deficit contracted to \$207 million in the first quarter of 2012 from \$215 million in 2011.

§ Services transactions realised a surplus of \$84 million for the quarter. This represented a \$3 million decrease year-over-year.

§ The surplus on Bermuda's primary income account grew to \$302 million in the first quarter of 2012.

## **Capital and Financial Account**

Transactions on Bermuda's asset accounts resulted in a net lending position of \$30 million. Factors influencing this performance include:

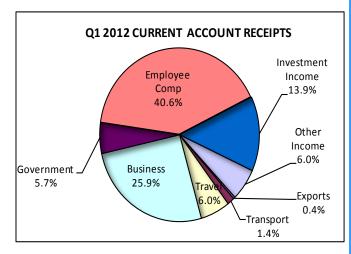

§ Bermuda's net acquisition of financial assets resulted in a draw down of \$1,147 million compared to an accumulation of \$209 million in 2011.

§ Bermuda reduced its incurrence of financial liabilities by \$1,177 million this quarter compared to an increase of \$95 million in 2011.

## **Current Account Surplus = \$145 million**

The current account recorded a surplus of \$145 million. This represented a \$31 million increase year-over-year. The growth mostly reflected a decline in payments which outpaced the decrease in receipts. First quarter payments fell by \$53 million to \$644 million when compared to the first quarter in 2011. In addition, receipts from goods and services for the same quarter abated \$23 million totalling \$789 million.

The largest contributor to the increase in the current account surplus was the primary income account which recorded surplus gains of \$25 million.

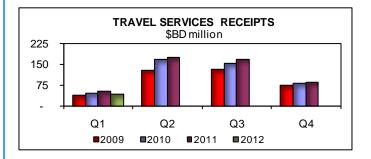

## Net payments for goods contracted

The value of goods imported fell by 4 per cent to \$211 million during the quarter. Revenue earned from exports was unchanged at \$3 million compared to last year. These transactions resulted in a net deficit on trade in goods totalling \$207 million during the first quarter of 2012.

#### The surplus on trade in services totalled \$84 million

Receipts generated from services transactions totalled \$300 million for the quarter. This was \$23 million below the level recorded in the corresponding quarter of the previous year. The decline in the services account receipts was driven by lower earnings on business services and travel Receipts from business services services. decreased \$16 million reflecting lower revenue from financial services and other services such as legal, accounting and management consultancy services. Travel earnings stood at \$46 million, or \$4 million below the level of receipts recorded in the first quarter of 2011. The decline in travel receipts was partly attributed to a decrease in tourist expenditure during the quarter. Receipts from government services also fell \$6 million compared to the previous year's level.

Payments for services decreased \$18 million to \$217 million. This decline was largely due to a \$19 million fall in outflows related to business services. Resident outlays on all major business service categories which include insurance, financial and ICT services were reduced during the quarter. Expenditure on all other service categories declined with the exception of transportation services which increased \$2 million. This increase was primarily due to a rise in air transport payments by residents on airline tickets.

## The surplus on the primary income account grew by \$25 million.

Transactions on the primary income account realised a surplus of \$302 million. This represented a 9 per cent increase year-over-year. Inflows of investment income grew by \$7 million mostly due to a rise in interest earnings on investments other than portfolio and direct investments. Income payments to non-residents on assets held in Bermuda fell \$26 million due to a drop in dividend payments to direct investors. The surplus on income earned in the form of compensation from labour services grew \$1 million over 2011. The increases in receipts from investment income and employee compensation were offset by a \$9 million decline in payroll tax receipts received from the international business sector.

# Payments of secondary income exceeded receipts by \$33 million

The secondary income account reflects the balances on donations, insurance claims and other transfers between residents and non-residents. Payments totalled \$54 million compared to transfer inflows of only \$21 million. The \$33 million deficit reflected primarily an excess of claims paid by insurance companies to non-residents over premiums received during the quarter.

## CAPITAL AND FINANCIAL ACCOUNT

## **Capital Account**

No transactions were recorded on the capital account

## Financial account transactions resulted in a net lending position of \$30 million

Bermuda residents withdrew more than they accumulated on asset holdings overseas, leading to a negative net acquisition of \$1,147 million for the first quarter. Holdings of portfolio investment assets overseas experienced the largest decline of \$1,374 million.

During the same period, Bermuda residents paid back more on their debt than they incurred in new liabilities in the amount of \$1,127 million. This decrease was mostly associated with investments of currency and deposits.

## INTERNATIONAL INVESTMENT POSITION

## Bermuda's net asset position increases to \$1,525 million

At the end of the 1<sup>st</sup> quarter 2012, Bermuda's stock of foreign assets exceeded its stock of foreign liabilities by an estimated \$1,525 million. This net foreign asset position increased by \$57 million over the fourth quarter of 2011.

## International assets fall with decline in portfolio investment holdings

Bermuda's stock of foreign assets stood at \$13,242 million at the end of the 1<sup>st</sup> qtr 2012. This represented a decline from the 4<sup>th</sup> quarter 2011 asset position of \$14,426 million. The decrease primarily reflected a reduction in portfolio investment assets held overseas, particulary short-term debt securities of the financial sector.

## Bermuda's net liability position on direct investment narrows

The stock of direct investment in the Bermuda economy by non-residents fell by \$205 million to \$1,417 million. In contrast, Bermuda's stock of direct investment overseas grew by \$180 million in the first quarter to \$759 million as a result of increased equity and investment fund shares. As a result, Bermuda's net direct investment liability position narrowed to \$658 million.

## Non-financial corporations and general government hold a net liability position

Two resident instutional sectors held a net liability position with the rest of the world at the end of the 1<sup>st</sup> quarter. The general government sector's net external debt stood at \$974 million while non-financial corporations owed \$774 million. Financial corporations held a net asset position of \$3,252 million on the strength of portfolio investment holdings such as bonds, notes and money market instruments. Non-profit institutions serving households also recorded a net asset position of \$21 million at the end of the first quarter.

#### WHAT IS THE BALANCE OF PAYMENTS?

The balance of payments (BOP) is a statistical statement that systematically summarizes, for a specific time period, the economic transactions of an economy (resident) with the rest of the world (non-resident). Quite simply, the balance of payments covers all economic transactions between Bermuda and the rest of the world. It includes the **current account** and the **capital and financial account**.

In principle, the current account and capital and financial account should balance each other out. If Bermuda sells more goods and services than it buys (i.e., if it has a current account surplus), it has to lend money

abroad to finance its exports (i.e., run a capital and financial account deficit). In theory, therefore, the balance of payments is always zero.

Example: Every dollar spent by a tourist in Bermuda earns the economy \$1 in foreign currency which can be used to purchase goods and services from overseas.

#### **DEFINITIONS AND NOTES**

#### **Capital Account**

The capital account details transactions that involve the receipt or payment of capital transfers and acquisitions and disposal of non-produced, non-financial assets.

## **Financial Account**

All transactions associated with changes of ownership in foreign financial assets and liabilities of the economy are included in the financial account. Such changes include the creation and liquidation of claims on, or by, the rest of the world.

#### **Reserve Assets**

Reserve Assets are those external assets that are readily available to and controlled by monetary authorities for meeting balance of payments financing needs, for intervention in exchange markets to affect the currency exchange rate, and for other related purposes (such as maintaining confidence in the currency and the economy, and serving as a basis for foreign borrowing).

#### Resident

The concept of residency is very important in the BOP because the BOP is in fact a statement of transactions between residents and non-residents. A unit must have a centre of predominant economic interest within an economic territory for at least one year or more to be considered resident of that territory.

#### Seasonal workers

Workers from overseas who come to Bermuda to work for a few months in the year or every year are considered seasonal workers. Their expenditure on living expenses in Bermuda is included as travel receipts. Similarly, their income received from employers in Bermuda is a BOP outflow under compensation of employees.

#### **Current Account**

Transactions on goods, services, income, and current transfers are allocated to the current account. Transactions in exports and interest income are examples of receipts, while imports and interest expenses are payments. The difference between payments and receipts determines if Bermuda's current account is in surplus or deficit.

## **Payments**

All monies that are paid by residents to non-residents are considered payments.

#### Receipts

All monies that are received by residents from non-residents are considered receipts.

#### **Balancing Item (Net Errors & Omissions)**

A current account surplus or deficit should correspond to an equivalent outflow or inflow in the capital and financial account. In other words, the two accounts should add to zero. In fact, as data are compiled from multiple sources, the two balance of payments accounts rarely equate. As a result, the **balancing item** is the net unobserved inflow or outflow needed to balance the accounts.

## WHAT IS THE INTERNATIONAL INVESTMENT POSITION (IIP)?\*

The international investment position (IIP) is a record of Bermuda residents' investment abroad and nonresidents' investment in Bermuda. The IIP shows the balance sheet position of financial claims on nonresidents as assets and non-residents' claims on Bermuda as liabilities. The balance between these two positions represents the IIP; that is, an excess of assets over liabilities indicates a positive contribution to the nation's net wealth and the reverse signifies a negative contribution.

## WHY IS THE IIP IMPORTANT TO MEASURE?\*

The composition of the IIP allows financial analysts to assess the vulnerability of the economy to changes in external market conditions. Details from the IIP can highlight mismatches in maturity of instruments and currency that can affect an economy's ability to service debt in the face of shock; financial structure problems; solvency problems and dependency problems where overreliance on another economy can present contagion concerns. Therefore, the IIP allows for a more in depth analysis behind balance sheet weaknesses that can lead to a modern-day financial crisis.

## **DEFINITIONS AND NOTES**

## **Direct Investment**

Direct investment represents the value of long-term capital owned in subsidiaries, affiliates and branches by investors in a position to exercise control or a significant degree of influence on the management of the enterprise. A measure of total investment controlled in Bermuda by foreign direct investors, or abroad by Bermudian direct investors, indicates the leverage type impact of ownership.

#### **Portfolio Investment**

Portfolio investment abroad by Bermuda residents and in Bermuda by non-residents is defined as the holding of debt or equity securities other than those included in direct investment or reserve assets.

#### **Financial Derivatives**

A financial derivative contract is a financial instrument whose value is based on the value of an underlying security such as a stock or bond, commodity or other financial instrument.

## Other investment

Other investment is a residual category that includes positions and transactions other than those included in direct investment, portfolio investment, financial derivatives and employee stock options (ESO), and reserve assets.

## **Currency and deposits**

Currency consists of notes and coins that are of fixed nominal values and are issued or authorized by central banks, monetary authorities such as the BMA or governments.

Deposits include all claims that are (a) on the central bank and other deposit-taking corporations; and (b) represented by evidence of deposit.

## **Debt securities**

Debt securities are negotiable instruments serving as evidence of a debt.

#### Loans

Loans represent the extension of money from Bermuda residents to non-residents and vice versa, with an agreement that the money will be repaid.

## Insurance, pension, standardized guarantee schemes

Insurance, pension, and standardized guarantee schemes all function as a form of redistribution of income and wealth mediated by financial institutions.

#### Other accounts receivable/payable

Other accounts receivable/payable consists of trade credit and advances between Bermuda and non-residents and, other miscellaneous receivables/payables.
