1. INTRODUCTION

1.1 SECURITY CLASSIFICATION

This document is marked as UNCLASSIFIED as there are no sensitive details contained in it and it is expressly written to be circulated both internally and externally.

1.2 DATA INTEGRITY

The statistics, tables and graphs contained in this document are based on substantiated cases, which are active investigations of an incident that has definitely happened. This is as opposed to using incident data, which is an initial recording of a crime that has yet to be substantiated.

While every effort is made to ensure that the information contained in this report is accurate, the BPS makes no warranty, representation or guarantee as to the content, sequence, accuracy, timeliness or completeness of any data or information provided. The reader of the following pages should not rely on the data provided for comparison purposes over time, or for any reason. The BPS shall assume no liability for any errors, omissions, or inaccuracies in the information provided. The BPS will not be responsible for the use of, or the results obtained from the use of this document. The BPS assumes no liability for any decisions made or actions taken or not taken by the user in reliance of this document. Any use of the document for commercial purposes is prohibited.

1.3 EXPLANATION OF GRAPHS

The graphs used in this report include standard deviation, which has been used as a means of objectively measuring how much the crime rate has varied over time and is useful in identifying extreme highs and lows of crime. Standard deviation has been used so that where the crime rate is above the red line (2 standard deviation above the mean average), it is considered exceptionally high. Where the crime rate is below the blue line (2 standard deviation below the mean average), it is considered exceptionally low. In both cases it can be referred to as statistically significant (high or low) and is an indication of whether the quarterly statistics are exceptionally high or exceptionally low.

1.4 AIM

The aim of this report is to produce accurate, timely, objective information that:

- Enables informed decisions to be made on the types of crime that threaten the safety of the community.
- Is used to proactively manage risks to the island and ensure effective policing, redeploying and directing resources at a strategic and tactical level, as required.
- Facilitates effective and open communication with our stakeholders, developing the means to inform them of the plans, efforts and progress being made by the BPS.
- Provides meaningful information as one of the means of reassuring communities in Bermuda.

1.5 Executive Summary

There were 1,038 offences in Q2 2012, a **decrease** of **-10.7%** when compared to Q1 2012. All Crime in Q2 2012 is the 3rd lowest quarterly figure since 2000. ALL CRIME	1139	1076	1165	1163	1038	-10.7%	-125

2.2 TRENDS

Q2 2012 is the 3rd lowest quarterly crime figure since Q1 2000¹. In 2008 and 2009, all quarters were above 1,200 offences. Since 2010, only two quarters have been above 1,200 offences. This reinforces the view that there has been a decrease in the long term trend of all crime in Bermuda. This can be seen in Figure 3, which shows crime for the last 18 quarters, with Q2 figures highlighted in boxes:

Figure 3: All Crime By Quarters (Q1 2008 – Q2 2012)

¹ See Appendix D for a chart showing All Crime In Bermuda By Quarter (Q1 2000 – Q2 2012).

3. CRIMES AGAINST THE PERSON

Figure 5: Crimes Against the Person By Quarters (Q1 2008 – Q2 2012)

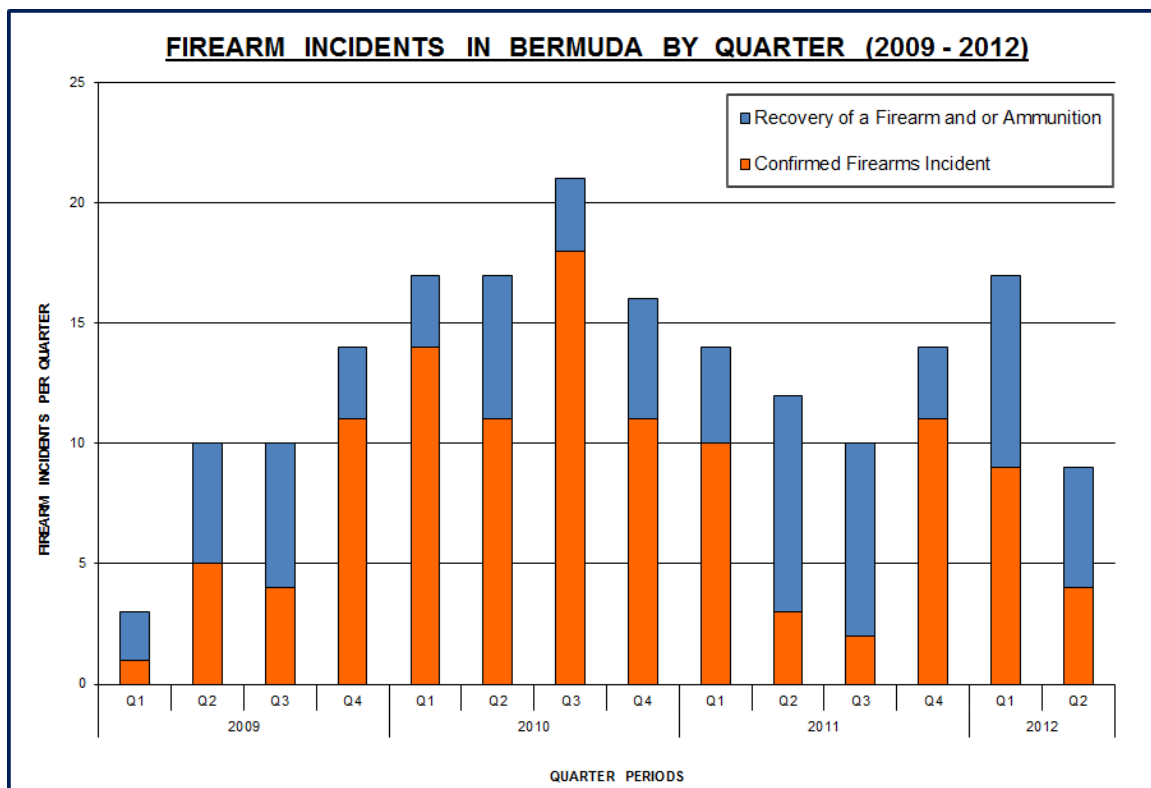

4. FIREARM INCIDENTS

Firearm Offences are included within Crimes Against The Community (Section 5); however firearm incidents² may not necessarily be recorded as offences, as often there is no suspect or even a victim.

4.1 SUMMARY

In Q2 2012 there were 9 firearm incidents of which 4 were Confirmed Firearm Incidents and 5 were Recovery Of A Firearm and or Ammunition. This is a decrease from the 17 firearm incidents in Q1 2012. This can be seen in Figure 6 below, which shows firearm incidents between 2009 and 2012:

Figure 6: Firearm Incidents In Bermuda (2009 - 2012)

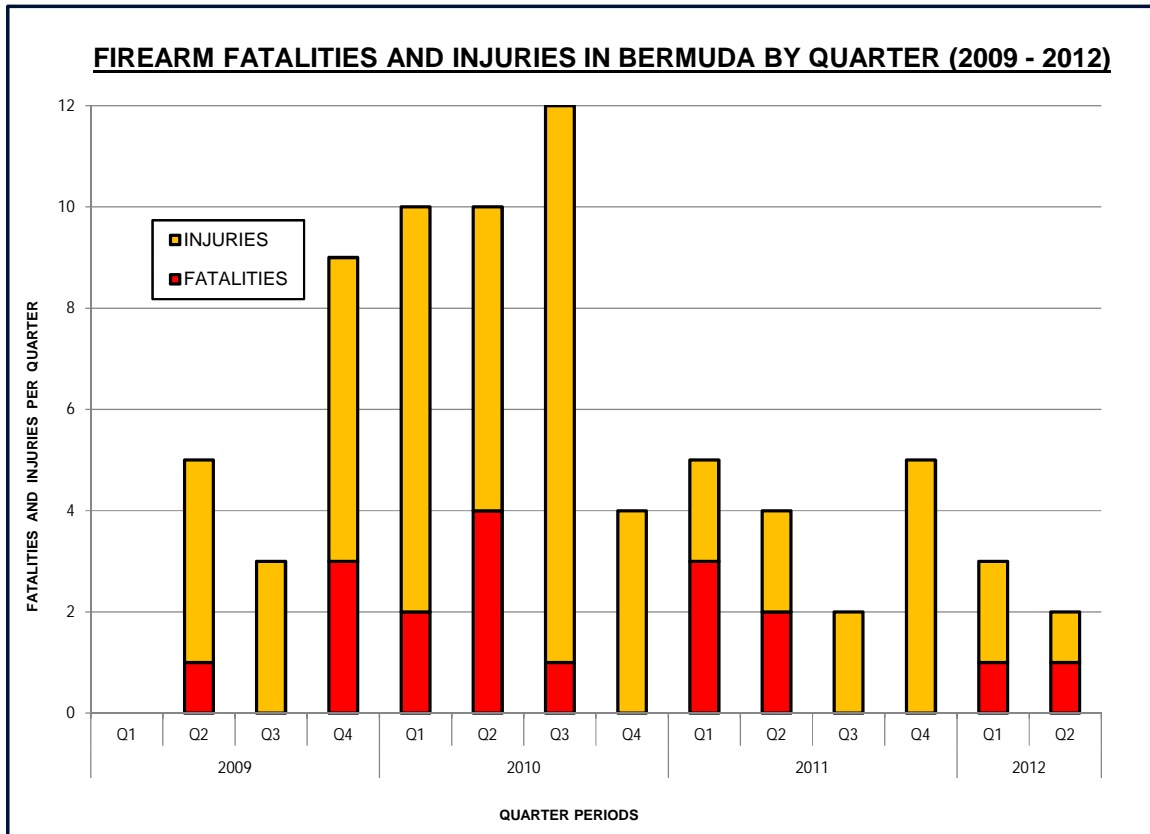

² To enable accurate recording, analysis and reporting of firearm incidents, the BPS classifies firearm incidents into 2 categories which are split into **Confirmed** or **Recovery Of A Firearm and Or Ammunition**. An **Confirmed** incident is where a person has been shot (fatally or wounded), a person has been shot at and corroboration is provided by forensic recovery of ballistic material, CCTV footage showing a firearm, reliable witness testimony or a person is charged with a firearms offence connected to the incident, a firearm is used in the commission of a criminal act and corroboration has been obtained, or a report of a firearm discharged and forensic material (bullet casings) have been recovered. A **Recovery Of A Firearm and Or Ammunition** is where a firearm, ammunition or imitation firearm is recovered by police.

4.2 FIREARM TRENDS

In Q2 2012, there were 5 firearms and/or ammunition recovered, 1 fatality and 1 injury. This brings the total number of persons shot since the dramatic increase of firearm incidents in Q1 2009 to 74, of which 18 have been fatal shootings. Figure 7 (below) shows firearm fatalities and injuries from Q1 2009 to Q2 2012:

8.3 Drug Seizures

The Bermuda Police Service continues to work with its partners both locally and overseas to disrupt the trafficking of controlled drugs. These partners include HM Customs Bermuda, U.S. Customs and the U.S. Drug Enforcement Administration. Despite these partnerships, controlled drugs are still entering Bermuda which is evidenced in the number of 'street' level drug seizures. This can be seen in Figure 16, which shows Drug Seizures By Location:

Figure 16: Drug Seizures In Bermuda By Location (Q2 2012)

Location	Number Of Seizures
PORT	51
STREET	107
OVERSEAS	3

As can be seen in Figure 16, the majority of drugs seized are at street level (107) while there were 51 seizures at ports (including LF Wade) and 3 overseas seizures which involved overseas law enforcement agencies.

An estimated total of 49.6 Kg of controlled drugs with an estimated street value of \$3.2 million has been seized in Q2 2012, with Cannabis the most common drug with 44 Kg seized at a value of \$2.2 million. Cocaine is the next highest, with 3.9 Kg seized with a value of \$0.9 million. The type, weight and value of the drugs seized broken down by Port, Street and Overseas seizures can be seen below in Figure 17:

Stop and Searches are conducted in a proportionate and accountable manner and only when Police Officers have occasion to exercise lawful powers. They are carried out with courtesy, consideration and respect for the individual being stopped. While the figures are not performance indicators, they are a reflection of the frequency of engagement between proactive Police Officers and Prolific Priority Offenders. They provide an indication of police activity, particularly regarding the number of highly visible patrols in the community.

There were 1,127 Stop and Searches in Q2 2012, a decrease of -833 or -42.5% compared to Q1 2012. In comparison to Q2 2011, Q2 2012 has decreased by -5,314 or -82.5%. This can be seen in Figure 28, showing Stop & Searches for the last 14 quarters, with Q2 figures highlighted in boxes:
