

69 Luxury Suites & Guestrooms

Completely renovated with new furniture, fixtures, and improved balconies overlooking Hamilton Harbour.

1609

An 100-seat open-air, casual dining experience overlooking Hamilton Harbour.

Infinity Resort Pool

Undisrupted views of Hamilton Harbour, stunning cabanas, and a new hot tub.

Marina

60 berths to accommodate all sizes of vessels from pleasure craft to tournament fishing boats and mega yachts.

There are 21 subcontractors represented by 90 staff.

What it takes to walk on water:

- The exterior dimensions of the new marina will be 280 ft on the west side, 500 ft on the south side, and 180 ft on the east side.
- In total 9,300 ft of pylon will be used to construct the marina.
- Approximately 50,000 yards of concrete will be used.
- Three floating docks will be added to the interior in June.
- The marina and 1609 are built to withstand a Level 6 Hurricane (the most severe hurricane ever to hit Bermuda is a Level 5).
- Quiet construction is due to a “Vibratech Hammer”, which combines vibration with 100 tons of pressure to push the pylons into the sea bed. The pylons are then tapped down using 150 tons of pressure.
- The exact placement of the pylons is determined using surveying equipment, and they are inserted at an angle to add extra stability to the structure.

The Poinciana Beautification Project will use:

- **50** gallons of white ceiling paint
- **150** gallons of “misty blue” wall paint
- **500** new LED lights
- **1,400** new plugs and switches
- **2,000** square yards of carpet
- **6,000** square feet exterior balcony tile
- **8,000** lineal feet of pipe
- **11,000** square feet of porcelain floor tile
- **14,000** square feet of marble wall tile
- **70,000** lineal feet of data cabling
