

GDP in current prices up 4.0 per cent in 2015

Final estimates of Gross Domestic Product (GDP) in current prices for 2015 were measured at \$5.9 billion (Table 1), a 4.0 per cent increase over 2014 (Figure 1). Thirteen of the fifteen industries recorded growth in value added led by international business activity and retail trade activity which experienced the largest nominal increases in value added. The rise in economic growth translated into a 4.1 per cent gain in GDP per capita which was measured at \$96,018 per person in 2015.

Real GDP increased 0.6 per cent

When adjusted for inflation, final estimates of GDP in constant prices increased 0.6 per cent (Figure 2). In 2015, average price levels as measured by the selected basket of goods and services in the Consumer Price Index (CPI), increased 1.5 per cent. Alternatively, average price levels for all goods and services produced in the economy (economy-wide inflation) as measured by the GDP implicit price index (IPI) increased 3.3 per cent (Table 7). After factoring out economy-wide inflation, GDP in constant dollars was measured at \$4.6 billion in 2015 (Table 4).

National Accounts Aggregates

At the end of 2015, Gross National Disposable Income (GNDI) reached \$6.0 billion (Table 10). GNDI represents the income that can be used by households for consumption or savings as well as the income not distributed to owners of equity for non-financial and financial corporations. GNDI increased 3.4 per cent compared to 2014 due mostly to a higher GDP. After adjusting GNDI for consumption expenditure, Gross National Savings (GNS) was measured at \$1.9 billion (Table 10) which represented a 6.0 per cent increase year-over-year. Of the total savings, \$704.2 million was spent on gross capital formation (investment in capital goods) which positioned the Bermuda economy as a net lender to the rest of the world in the amount of \$1.2 billion.

GDP Highlights by Industry (current prices – Table 1, Table 2, Table 3)**Industry 01 – Agriculture, forestry and fishing**

- Value added for agriculture, forestry and fishing activity advanced 14.0 per cent in 2015, or \$5.1 million. The growth in value added was attributed primarily to landscaping and gardening activity.

Industry 03 – Manufacturing

- Activity for the manufacturing industry rose 10.6 per cent reflecting increased sales related to building and repairing of ships and boats.

Industry 04 – Electricity, gas and water supply

- Value added for the electricity, gas & water supply industry was \$6.0 million (+6.9 per cent) higher year-over-year.
- Declines in the cost of production exceeded the decline in output for the industry, resulting in a gain in value added.

Industry 05/02 – Construction and quarrying

- Value added for construction and quarrying activity increased 6.7 per cent in 2015. This increase was attributed to renovation work at one of the Island's largest hotels as well as construction activity associated with the America's Cup.

Industry 06 – Wholesale and retail trade and repair services

- Wholesale, retail trade and repair services recorded an increase in value added of 10.9 per cent, the second consecutive year of growth.
- Within this industry, growth in value added was led primarily by sales and repairs of motor cycles (+43.0 per cent), sales of motor vehicles (+32.3 per cent) and sales by food stores (+12.9 per cent).
- Value added by businesses selling household appliances and equipment rose 27.2 per cent, while businesses trading in hardware, paints, glass and other construction materials increased 11.9 per cent.

Industry 07 – Hotels and restaurants

- Value added for hotels and restaurants was 3.0 per cent higher in 2015. Within this industry, restaurants saw a \$7.3 million (+7.1 per cent) improvement over the previous year.
- Despite a 2.0 per cent decline in visitor arrivals for 2015, the value added for the hotel industry increased 0.4 per cent due mostly to revenue from food sales and a marginal increase in room revenue.

Industry 08 – Transport and communications

- Value added for transport and communications decreased 5.4 per cent or \$13.9 million in 2015. This decline was largely driven by lower receipts for the provision of wireless services, as well as decreased output for postal services and freight transport by road.

Industry 09 – Financial intermediation

- Value added for businesses involved in financial intermediation (commercial banks and insurance companies) decreased 2.1 per cent. This decline was attributed mostly to lower net interest received and lower net fees and commissions received by banks. Insurance companies also recorded decreases in reserves and premium supplements during the year.

Industry 10 – Real estate and renting activity

- Value added for the real estate and renting industry rose 2.1 per cent. This industry remained the second highest contributor to GDP, contributing 16.6 per cent in 2015. The increase can be attributed to an uptick in property transactions including a greater volume of commercial property sales.

Industry 11 – Business activities

- Value added for business services increased 1.4 per cent over 2014. This increase was led by higher sales of accounting, book-keeping and auditing activities (+9.5 per cent), computer and related activities (+4.2 per cent) and legal services (+2.3 per cent).

Industry 12 – Public administration

- Continued reductions in wages, salaries and employee overheads led to a decline in government spending and a 1.2 per cent decrease in value added to the Bermuda economy.

Industry 13 – Education, health and social work

- Value added for education, health and social work activity increased 4.5 per cent in 2015. Private health activities and social work by private organizations experienced the largest increases in output.

Industry 14 – Other community, social and personal services

- Other community, social and personal services increased 13.7 per cent, or \$15.2 million in 2015. This improvement was due to recreational, cultural & sporting activities (+30.4 per cent) related to the America's Cup.

Industry 15 – International business activity

- Value added by the international business industry advanced 5.3 per cent in 2015 influenced by increases in wages, salaries & benefits and investment compensation. This industry was the largest contributor to GDP, representing 28.0 per cent of total GDP.
- Businesses offering financial and related services recorded an 8.2 per cent gain in value added.
- Businesses offering insurance-related services including reinsurance, brokerage and insurance management experienced a 5.6 per cent increase in value added.
