## **1. INTRODUCTION**

### **1.1 SECURITY CLASSIFICATION**

This document is marked as **UNCLASSIFIED** as there are no sensitive details contained in it and it is expressly written to be circulated both internally and externally.

### **1.2 DATA INTEGRITY**

The statistics, tables and graphs contained in this document are based on substantiated principle offences, which have been actively investigated. This is as opposed to using Event records, which is the initial request from the public or the direct deployment of police resources to deal with something that *may* be recorded as an offence.

While every effort is made to ensure that the information contained in this report is accurate, the BPS makes no warranty, representation or guarantee as to the content, sequence, accuracy, timeliness or completeness of any data or information provided. The reader of the following pages should not rely on the data provided for comparison purposes over time, or for any reason. The BPS shall assume no liability for any errors, omissions, or inaccuracies in the information provided. The BPS will not be responsible for the use of, or the results obtained from the use of this document. The BPS assumes no liability for any decisions made or actions taken or not taken by the user in reliance of this document. Any use of the document for commercial purposes is prohibited.

### **1.3 EXPLANATION OF GRAPHS**

The graphs used in this report include standard deviation, which has been used as a means of objectively measuring how much the crime rate has varied over time and is useful in identifying extreme highs and lows of crime. Standard deviation has been used so that where the crime rate is above the red line (2 standard deviation above the mean average), it is considered exceptionally high. Where the crime rate is below the blue line (2 standard deviation below the mean average), it is considered exceptionally low. In both cases it can be referred to as statistically significant (high or low) and is an indication of whether the quarterly statistics are exceptionally high or exceptionally low.

### **1.4 AIM**

The aim of this report is to produce accurate, timely, objective information that:

- Enables informed decisions to be made on the types of crime that threaten the safety of the community.
- Is used to proactively manage risks to the island and ensure effective policing, redeploying and directing resources at a strategic and tactical level, as required.
- Facilitates effective and open communication with our stakeholders, developing the means to inform them of the plans, efforts and progress being made by the BPS.
- Provides meaningful information as one of the means of reassuring communities in Bermuda.

### **1.5 SCHEDULE OF REPORTING**

Prior to 2016, crime statistics reports were produced every quarter and they also included drug seizure information. Q1 and Q2 2016 are the first crime statistics reports to be produced at the same time and this is scheduled twice a year. Drug seizure information will be made available in a separate report at the end of the calendar year.

### 1.5 Executive Summary

In Q1 and Q2 2016, **3** people were murdered (Patrick DILL, Jevon DANIELS and Fiqre CROCKWELL), and **3** people were shot and injured (Kofi DILL, Jahnai BAILEY-HAYWARD and Jhquone CALLABRAS). An investigation was also recorded with 1 offence of conspiracy to murder.

Between Q1 2016 and Q2 2016, All Crime increased by **+16 offences**, from **861** to **877** offences. Despite this slight increase, the medium term trend of crime in Bermuda remains steady, while the long term trend is decreasing. To put this in context, offences for the last 16 quarters (Q3 2012 to Q2 2016) were within a range of 750 to 952, compared to the previous 50 quarters (Q1 2000 to Q2 2012), where there were only 2 quarters with less than 1,000 offences.

A summary of the 3 key crime headings and 20 crime categories for Q2 2016 in comparison to the previous quarter (Q1 2016), the same quarter last year (Q2 2015) and the 5 year trend is shown below in Figure 1:

A **Confirmed** incident is where a person has been shot (fatally or wounded), a person has been shot at and corroboration is provided by forensic recovery of ballistic material, CCTV footage showing a firearm, reliable witness testimony or a person is charged with a firearms offence connected to the incident, a firearm is used in the commission of a criminal act and corroboration has been obtained, or a report of a firearm discharged and forensic material (bullet casings) have been recovered. A **Recovery Of A Firearm and Or Ammunition** is where a firearm, ammunition or imitation firearm is recovered by police.

## 10. STOP AND SEARCHES

### 10.1 SUMMARY

Stop and Searches are conducted in a proportionate and accountable manner and only when Police Officers have occasion to exercise lawful powers. They are carried out with courtesy, consideration and respect for the individual being stopped. While the figures are not performance indicators, they are a reflection of the frequency of engagement between proactive Police Officers and Prolific Priority Offenders. They provide an indication of police activity, particularly regarding the number of highly visible patrols in the community.

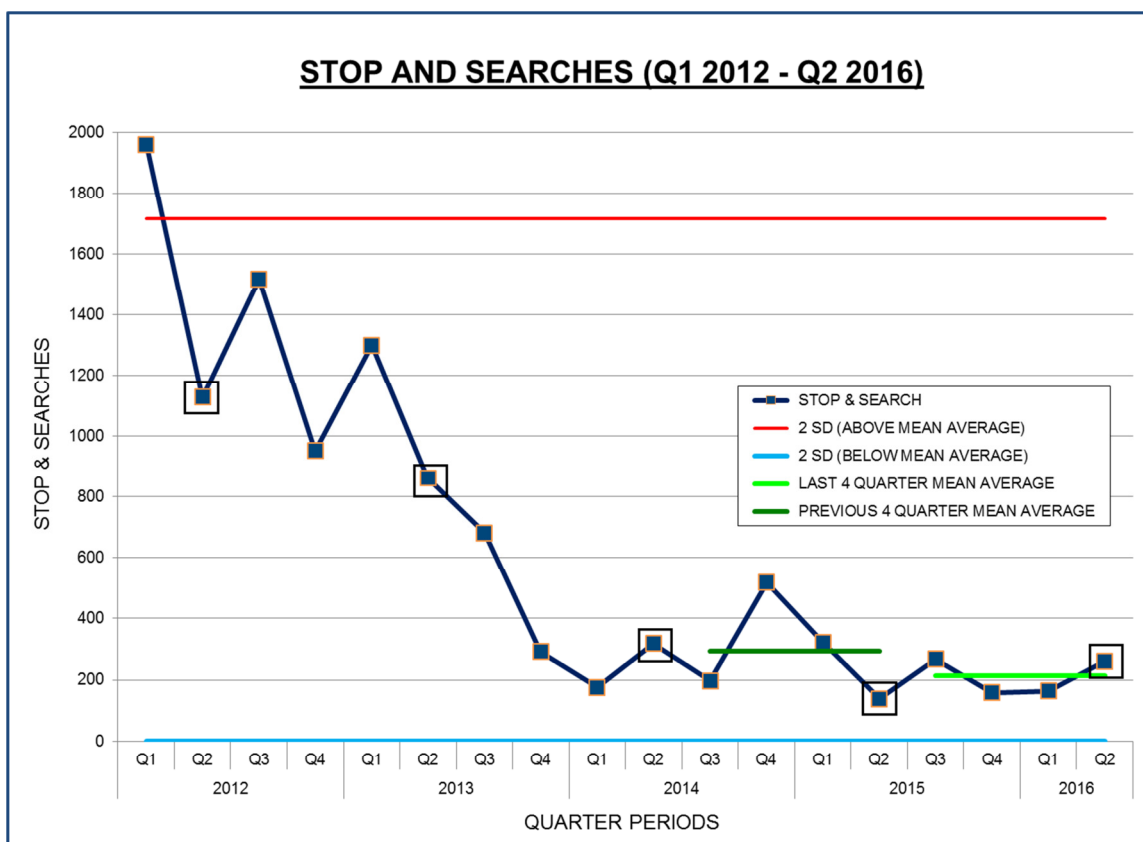

In Q1 2016 there were **164** Stop and Searches and in Q2 2016 there were **261** Stop and Searches , an **increase** of **+97**, as shown below in Figure 23.

## **11. PROCEEDS OF CRIME ACT (POCA) SEIZURES**

### **11.1 SUMMARY**

POCA seizures totalled **\$10,612,476.96** in Q1 2016 and **\$123,673.52** in Q2 2016.

New legislation was passed in 2014 within Section 36 of the Proceeds of Crime Act 1997, which introduced Civil Recovery Orders. These are dealt with by the Attorney Generals office, in partnership with the Bermuda Police Service and refer to funds from unlawful conduct committed in other jurisdictions, laundered through the banking systems and held in accounts in Bermuda. Due to including information on Civil Recovery Orders, a breakdown of all POCA seizures for the last 5 quarters is below in Figure 26:
