BLACKBERRY

Trade Mark Application No. 58241

Class 9: Downloadable computer software for cybersecurity, detecting and mitigating network attacks using artificial intelligence, machine learning and/or deep learning; downloadable computer software for continuous monitoring, identifying, verifying, analyzing, comparing, classifying, sorting and scoring of collected or acquired data from network traffic, network communication, network flow data, and network intercommunication using artificial intelligence, machine learning and/or deep learning; downloadable computer software for providing initiation, distribution, delivery and

response tracking of emergency notifications to users via personal communication devices and public mass communication devices; downloadable computer software for supporting exchange of information and collaboration processes amongst organizations and people during emergency and crisis situations; downloadable computer software for the purposes of data collection, monitoring, and mass notification services for managing emergency, and crisis and business critical situations and improving crisis communications capability; downloadable computer software for the secure transmission of mass notification emergency information via audio, video and electronic communications networks and devices, including social networks; downloadable computer software for managing and analyzing data feeds and data inputs in the field of crisis reporting, communication and management, and for sending notifications through multiple IP (Internet Protocol) network channels and delivery services; downloadable computer software for loading data from personnel directories, and managing users for purpose of crisis communication; downloadable computer software for managing organization directories and connections across organizations for the purpose of connecting them and facilitating collaboration before, during and after crisis situations; downloadable computer software for locating personnel for security and safety purposes using a global positioning system, user self-reporting, and other locating means; downloadable computer software for electronically monitoring, detecting and reporting on alarms, alerts, emergencies, hazards, security threats, and dangerous weather; downloadable computer software for notifying individuals and organizations of a changed status or condition of a sensing device or input feed via network based message alerts; downloadable software in the nature of a mobile application for sending, receiving, confirming and responding to alerts, messages, and notifications via wireless communications networks or the Internet; downloadable computer software in the nature of desktop software applications for providing desktop notifications that capture the user's attention with audio-visual signals and allow users to confirm, respond to notifications or receive additional information related to notifications; downloadable computer software for use in threat prevention, detection, investigation, response, remediation and analysis for computers, computer systems, servers, computer networks, endpoints, mobile devices, enterprise of things (EOT) and Internet of things (IOT) enabled devices; computer software for managing computer network endpoint security and predicting and monitoring security threats to computer networks; downloadable computer operating system programs; downloadable computer software for performing data security functions in the field of cryptographic network security; downloadable computer software for automating a process for authentication of identity using existing databases in connection with the issuance and management of digital certificates used for

authentication or encryption of digital communications over the Internet and other computer networks; downloadable computer software, namely, encryption software to enable secure transmission of digital information; downloadable computer software to integrate managed security, namely, virtual private network (VPN), public key infrastructure (PKI), digital certificate issuance, verification and management; cloud computing software; downloadable Internet of things (IOT) management software platform consisting of downloadable cloud-based software, mobile and desktop applications, and premise-based gateway agent software; downloadable computer software for use in managing device-to-device, device-to-cloud and cloud-to-device communications; downloadable computer software for machine-to-machine (M2M) communication, remote data collection and process control; downloadable computer software for asset tracking; downloadable computer software to track and manage IP (Internet Protocol)-enabled machines and other connected devices; downloadable software development kits (SDKs), Application Programming Interface (API) software, and Enterprise Application Integration (EAI) software for creating software and applications related to machine to machine (M2M) devices, network and Internet connected devices, and IOT devices; downloadable computer software for sending, receiving and analyzing data from network and Internet-connected devices; downloadable computer software, namely, software and middleware used to allow software applications to interface with mobile and remote devices and to allow connectivity, memory storage, and device management, all via a computer network; downloadable computer software and hardware for fleet asset tracking in the transportation industry; downloadable computer software and hardware for tracking and managing IP (Internet Protocol)-enabled machines; downloadable computer software and hardware to collect, filter and process electronic data, namely, audio, voice, video, images, text, electronic mail and messaging, documents, and vehicle and driver telematics and analytics concerning driver behavior, vehicle diagnostics, maintenance, performance, location, and downtime; downloadable computer software systems for use in dispatch, video monitoring, driver compliance, driver performance, driver scorecards, document management, trailer tracking, asset tracking, vehicle tracking, telematics, fuel economy tracking, driver workflow, integrations with third party software, vehicle utilization, temperature tracking, vehicle inspection reports; mobile phones, smart phones, tablet computers and wireless communication devices for voice, data, or image transmission; accessories for mobile phones, smart phones, tablet computers and wireless communication devices, namely, headsets and earphones, phone chargers, battery chargers, mounts, cradles and holders for hands-free phone use, charging and docking stations, cell phone and tablet computer protective cases, protective covers and cases for handheld electronic devices,

cell phone holsters, and speakers; downloadable computer software for mobile phones, portable media players, and handheld computers, namely, software for sending digital photos, videos, images, and text to others via the global computer network; downloadable computer software in the fields of Mobile Device Management (MDM), Mobile Applications Management (MAM), Mobile Security Management (MSM), Mobile Information Management (MIM), and mobile Identity and Access Management (IAM); downloadable computer software to allow network administrators to monitor, manage, and quarantine devices that are granted access to a network; all included in Class 9.

To be associated with mark no: 41907, 41908, 41909, 41910, 41911, 41912, 41998, 41999, 42000, 58242 and 58243.

BLACKBERRY LIMITED, 2200 University Avenue East, Waterloo, Ontario, N2K0A7, Canada - 27/01/2020. Address for service is: ImPact Trademark Services LLC., Suite 206, Commerce Building, 54 Reid Street, Hamilton HM12, Bermuda.

BLACKBERRY

Trade Mark Application No. 58242

Class 38: Providing secure mass notification services through all communication devices, telephones, tablets, smartphones, email, text messaging, and instant messaging; providing electronic transmission of data and digital messaging via mobile handheld devices and via wired and wireless communication devices before, during and after critical situations; telecommunications services that enable users and organizations to electronically transmit messages, text, multimedia content, videos, audio, animation and images via a global computer network before, during and after critical situations; providing multiple user access to interactive databases through web sites on a global computer network to manage, administrate and use crisis communication capabilities; providing electronic transmission of converged data, address location information, text, pictures, and streaming media, all for use in crisis communications; providing telecommunication connectivity services for transfer of messages, audio, visual, and data information for crisis communications; secure electronic messaging services, namely, providing services to access, process, and transmit critical, time-sensitive notifications to individuals and organizations; telecommunication services, namely, data transmission and reception services via

telecommunications networks; electronic exchange of voice, data, audio, video, text and graphics accessible via computer and telecommunications networks; instant messaging services; providing secure electronic message alerts via the Internet, global computer and telecommunications networks; all included in Class 38.

To be associated with mark no: 41907, 41908, 41909, 41910, 41911, 41912, 41998, 41999, 42000, 58241 and 58243.

BLACKBERRY LIMITED, 2200 University Avenue East, Waterloo, Ontario, N2K0A7, Canada - 27/01/2020. Address for service is: ImPact Trademark Services LLC., Suite 206, Commerce Building, 54 Reid Street, Hamilton HM12, Bermuda.

BLACKBERRY

Trade Mark Application No. 58243

Class 42: Providing temporary use of non-downloadable computer software for measuring, assessing, identifying, detecting, analyzing, preventing, and responding to cybersecurity threats, attacks, risks, and vulnerabilities; providing temporary use of non-downloadable software for artificial intelligence, analytics-based machine learning, and deep learning software, all for the purpose of measuring, detecting, analyzing, preventing and responding to cybersecurity attacks; Design and development of crisis communication systems comprised of computer hardware and software; engineering and systems analysis in the field of crisis communication systems; computer services, namely, providing online system management services that allow users to remotely view, monitor, program, operate and control crisis communication systems; research in the field of crisis communication technology; testing of crisis communication systems comprised of computer software and hardware; cloud computing featuring software for providing crisis communication through multiple IP (Internet Protocol) network channels and delivery services; computer services, namely, integration of private and public cloud computing environments for crisis communication; computer services, namely, cloud hosting provider services for crisis communication; computer services, namely, installation of computer software for private cloud computing for crisis communication; consulting services in the field of cloud computing for crisis communication; computer services, namely, creating an online community for registered users to participate in discussions, get feedback from their peers, form virtual communities, invite other organizations to

the community and engage collaboration in the field of security and crisis communication and management; providing temporary use of online non-downloadable software featuring software for use in sending, receiving, confirming and responding to alerts, messages, and notifications in the field of crisis communication and management; providing temporary use of online non-downloadable software, namely, hosting software for use by others for use in sending, receiving, confirming and responding to alerts, messages, and notifications in the field of crisis communication and management; providing online non-downloadable computer software for the purposes of data collection, monitoring, and mass notification services for managing emergency and crisis situations and improving crisis communications capability; providing temporary use of on-line non-downloadable computer software for endpoint security, malware analysis, vulnerability testing, penetration testing, and vulnerability assessment; providing temporary use of online non-downloadable software for use in threat prevention, detection, investigation, response, remediation and analysis for computers, computer systems, servers, computer networks, endpoints, mobile devices, and Internet of things (IoT) enabled devices; providing temporary use of online non-downloadable software for predicting and monitoring security threats to computer networks; providing temporary use of online non-downloadable software for preventing unauthorized access to computers and computer networks; providing temporary use of online non-downloadable software for data analytics; design, development and maintenance of online computer software systems and software for operation and control of autonomous-driving vehicles; providing temporary use of online non-downloadable software for operation and control of autonomous-driving vehicles; providing temporary use of non-downloadable software applications and software development tools and platform as a services (PAAS) featuring computer software platforms that enable software developers to program and users to build and configure software applications that work in conjunction with such non-downloadable software applications and platforms to transfer, share, format, manipulate and integrate data, information and such developer software applications working in conjunction with and between such non-downloadable software applications and platforms and third party services; providing temporary use of online non-downloadable software featuring computer software in the field of electronic file security to allow users to encrypt, electronically watermark, provide restricted access to, and provide secure transmission and tracking of electronic documents and other electronic and digital files; platform as a services (PAAS) featuring computer software platforms for creating, managing, and deploying cloud computing infrastructure services; design and development of on-line computer software systems, computer hardware and computer software; technical support services, namely, installation,

administration, and troubleshooting of web and database applications; providing machine-to-machine (M2M) and Internet of Things Cori communication integration services, namely, the integration of disparate computer systems, networks, hardware and software through the application of wireless communication, artificial intelligence, machine learning and/or deep learning technology to facilitate M2M and IoT communication via web based browsers, personal digital assistants, mobile phones, embedded microprocessors, sensors and other electronic devices; providing temporary use of online non-downloadable software applications, software developer kits (SDKs) and software development tools, and platform as a service (PAAS) featuring computer development platforms that enable software developers to design, test, deploy, manage, and monitor internet of things (IoT) and machine-to-machine (m2m) devices; computer software services, namely, development, maintenance, repair, installation, and troubleshooting of computer software problems, support in the nature of diagnosing computer software problems, upgrade and updating computer software, authoring computer software, provision of computer software information, and consultation, design and customization of computer software and middleware; computer security consultancy; technical consulting and assistance with computer-based information systems and components, namely, technical consulting services in the fields of Mobile Device Management (MDM), Mobile Applications Management (MAM), Mobile Security Management (MSM), Mobile Information Management (MIM), mobile Identity and Access Management (IAM), datacenter architecture, public and private cloud computing solutions, cybersecurity, and evaluation and implementation of Internet technology and services; providing a secure website in the nature of a web hosting platform for, and providing temporary use of on-line non-downloadable software for allowing users and enterprise software applications to interface with remote devices and to allow connectivity, memory storage, device management, device monitoring, device tracking, and device auditing, all via a computer network; providing temporary use of online non-downloadable software featuring software for Enterprise Mobility Management (EMM), Unified Endpoint Management (UEM), Mobile Device Management (MDM), Mobile Applications Management (MAM), Mobile Security Management (MSM), Mobile Information Management (MIM), and mobile Identity and Access Management (IAM); providing temporary use of online non-downloadable software for the operation, management, security and maintenance of enterprise networks, data center management, resource management and performance optimization; all included in Class 42.

To be associated with mark nos: 41907, 41908, 41910, 41911, 41912, 41998, 41999, 42000, 58241 and 58242.
