Class 9: Batteries, automotive batteries, electric batteries for vehicles, electric storage cells, electric batteries, battery chargers, electric accumulators, apparatus for production, distribution and conversion of electric power and their parts and accessories; all included in Class 9.

CPS Technology Holdings LLC of 250 Vesey Street, 15th Floor, New York NY 10281 , U.S.A. - 30/10/2023 Address for service is: **Alexanders, Barristers & Attorneys of Belvedere Building, 69 Pitts Bay Road, Ground Floor, Pembroke, HM 08, Bermuda**

RADIANT POWERING INTELLIGENCE

Trade Mark Application No. BM-T-2025-63236

Class 9: Downloadable and embedded computer software in the field of infrastructure as a service (IAAS) for cloud computing; downloadable and embedded computer software in the field of infrastructure as a service (IAAS) for quantum computing; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), namely for the provision of hosting servers for use by others; downloadable and embedded computer software in the field of infrastructure as a service (IAAS) offering computer software platforms for syncing, storing, archiving, and backing-up data to cloud servers; downloadable and embedded computer software in the field of infrastructure as a service (IAAS) and technical support services for power management of data centers, heat management of data centers, energy management of data centers, cooling management of data centers, HVAC management of data centers, power grid management of data centers, localized grid management of data centers, battery storage and management of data centers; downloadable and embedded computer software in the field of platform as a service (PAAS) offering software for executing cloud computing based applications; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for implementing and deploying artificial intelligence, machine learning, deep learning and neural network algorithms, models and technology; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for training, management, deployment, testing, operation and maintenance of artificial intelligence models, artificial intelligence, machine learning, deep learning, natural language generation, statistical learning, supervised learning, un-supervised learning, data mining, data acquisition, data analysis, data integration, predictive analytics, inference computations, agentic artificial intelligence, artificial intelligence agents, large language models, small language models, diffusion models, multimodal artificial intelligence, business intelligence, computer vision, advanced visualization, image generation, video generation, voice generation, text generation, scientific data generation, financial data generation, industrial data generation, infrastructure data generation, medical data generation, Artificial General Intelligence (AGI), Artificial Narrow Intelligence (ANI), and Artificial Super Intelligence (ASI); downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for processing data, images, graphics, audio, video, and text; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS),

and software as a service (SAAS) for high performance computing; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for distributed computing; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for edge computing; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for on-premise computing; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for virtual machines; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for data pipelines; downloadable and embedded computer software in the field of infrastructure as a service (IAAS) platform as a service (PAAS), and software as a service (SAAS) for data storage including data lakes, graph databases, data containers, and data pipelines; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for connection of application programming interfaces (APIs); downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for quantum computing; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for facilitating data transmission, data collection, data analysis, and decision-making; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS), for simulation, modeling and data processing for use in data visualization, data analysis, data mining, data interpretation, predictive analytics, prescriptive analytics, accessing and editing large-scale data, interactive visual computing, video streaming, design of information graphics, and maximizing graphics processing and performance; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for general purpose computation, manipulation of collections of data, data analysis, image content analysis, video content analysis, information analysis, data transformation, data input/output, communications, speech recognition, graphics display, modeling and testing for use in the fields of artificial intelligence, deep learning, high performance computing, distributed computing, virtualization and machine learning; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for data management, analytics and pattern and activity recognition; downloadable and embedded computer software in the field of infrastructure as a service (IAAS) platform as a service (PAAS), and

software as a service (SAAS) for the integration of artificial intelligence and machine learning in the field of Big Data for business data analytics and user behavior analytics; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for the integration of artificial intelligence and machine learning in the field of robotics; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for creating, analysing and running programs for quantum algorithms; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for creating, analysing and running programs for quantum computers; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for creating, analysing and running programs for quantum simulations; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for optimizing power, performance and cost for computing services, and delivering computing services at scale; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for advanced cloud computing functions in the nature of machine learning, optimizing power, performance and cost for cloud computing services; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for operating semiconductors, computer chips, graphic processing units, tensor processing units, and central processing units; downloadable and embedded computer software in the field of infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) featuring software development tools for writing, building, running, testing, debugging, deploying, and storing software code, releasing and providing continuous delivery of software code, developing, deploying, analyzing, and debugging applications, and cloud infrastructure modeling; downloadable computer software development tools in the field of artificial intelligence; downloadable computer software development tools for use in modeling in the field of artificial intelligence; downloadable computer software development tools for use in testing in the field of artificial intelligence; downloadable computer software development tools for quantum computing; downloadable computer software development tools for data centers; downloadable and embedded computer software in the field of software as a service (SAAS) for deploying public and private cloud computing environments in the field of infrastructure as a service (IAAS); downloadable and embedded software in the field of security for computing including cyber security, fire walls,

authentication, verification, authorization, encryption, decryption, security key management, security token management, and data monitoring; quantum computers; quantum computing hardware.

Class 35: Business consultancy in the field of machine learning and artificial intelligence; business administration consulting services in the field of artificial intelligence; business data curation for artificial intelligence (AI) development; providing consumer product information for the purpose of selecting artificial intelligence (AI) hardware and software to meet the consumer's specifications; consultancy, advisory and information services relating to the aforesaid services.

Class 36: Financial services, namely, asset management services including management of funds and investments with respect to assets including technology, computing, data and artificial intelligence systems; investment services in the fields of technology, computing, data and artificial intelligence systems; financial and investment advisory services rendered using artificial intelligence (AI); investing in technology, computing, data and artificial intelligence systems; consultancy, advisory and information services relating to the aforesaid services.

Class 42: Infrastructure as a service in the field of cloud computing; infrastructure as a service (IAAS) in the field of quantum computing; infrastructure as a service (IAAS) provider for hosting servers for use by others; infrastructure as a service (IAAS) services offering computer software platforms for syncing, storing, archiving, and backing-up data to cloud servers; infrastructure as a service and technical support services for power management of data centers, heat management of data centers, energy management of data centers, cooling management of data centers, HVAC management of data centers, power grid management of data centers, localized grid management of data centers, battery storage and management of data centers; platform as a service (PAAS) offering software for executing cloud computing based applications; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for implementing and deploying artificial intelligence, machine learning, deep learning and neural network algorithms, models and technology; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for training, management, deployment, testing, operation and maintenance of artificial intelligence models, artificial intelligence, machine learning, deep learning, natural language generation, statistical learning, supervised learning, un-supervised learning, data mining, data acquisition, data analysis, data integration, predictive analytics, inference computations, agentic artificial intelligence, artificial intelligence agents, large language models, small language models, diffusion models, multimodal artificial intelligence, business intelligence, computer vision, advanced visualization, image generation, video generation, voice generation, text generation, scientific data generation,

financial data generation, industrial data generation, infrastructure data generation, medical data generation, Artificial General Intelligence (AGI), Artificial Narrow Intelligence (ANI), and Artificial Super Intelligence (ASI); infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for processing data, images, graphics, audio, video, and text; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for high performance computing; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for distributed computing; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for edge computing; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for on-premise computing; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for virtual machines; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for data pipelines; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for data storage including data lakes, graph databases, data containers, and data pipelines; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for connection of application programming interfaces (APIs); infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for quantum computing; infrastructure as a service (IAAS), platform as a service (PAAS),and software as a service (SAAS) for facilitating data transmission, data collection, data analysis, and decision-making; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for simulation, modeling and data processing for use in data visualization, data analysis, data mining, data interpretation, predictive analytics, prescriptive analytics, accessing and editing large-scale data, interactive visual computing, video streaming, design of information graphics, and maximizing graphics processing and performance; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for general purpose computation, manipulation of collections of data, data analysis, image content analysis, video content analysis, information analysis, data transformation, data input/output, communications, speech recognition, graphics display, modeling and testing for use in the fields of artificial intelligence, deep learning, high performance computing, distributed computing, virtualization and machine learning; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for data management, analytics and pattern and activity recognition; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for the integration of artificial intelligence and machine learning in the field of Big Data for business data analytics and user behavior analytics; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for the integration of artificial intelligence and machine

learning in the field of robotics; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for creating, analysing and running programs for quantum algorithms; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for creating, analysing and running programs for quantum computers; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for creating, analysing and running programs for quantum simulations; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for optimizing power, performance and cost for computing services, and delivering computing services at scale; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for advanced cloud computing functions in the nature of machine learning, optimizing power, performance and cost for cloud computing services; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) for operating semiconductors, computer chips, graphic processing units, tensor processing units, and central processing units; infrastructure as a service (IAAS), platform as a service (PAAS), and software as a service (SAAS) featuring software development tools for writing, building, running, testing, debugging, deploying, and storing software code, releasing and providing continuous delivery of software code, developing, deploying, analyzing, and debugging applications, and cloud infrastructure modeling; providing temporary use of non-downloadable computer software development tools in the field of artificial intelligence; providing temporary use of non-downloadable computer software development tools for use in modeling in the field of artificial intelligence; providing temporary use of non-downloadable computer software for use in testing in the field of artificial intelligence; providing temporary use of non-downloadable computer software for quantum computing; providing temporary use of non-downloadable computer software for data centers; software as a service (SAAS) for deploying public and private cloud computing environments in the field of infrastructure as a service (IAAS); security for computing including cyber security, fire walls, authentication, verification, authorization, encryption, decryption, security key management, security token management, and data monitoring; technical support services, namely, remote and on-site infrastructure management services for monitoring, administration and management of cloud computing applications and data centers; off-site data backup services; facilities and operational management for data centers; supply and management of power for data centers; design and development of software, databases, web services and cloud computing infrastructure; management services for data center networks; leasing of data center modules; rental of space in a computer co-location data centre infrastructure facility for others; providing cloud storage facilities for use as a data center for others; rental of data center facilities; rental of space in a computer co-location facility for containerized data centers of others, namely rental of space in a facility that provides space,

power, cooling, and physical security for computer servers, computer hardware, and computing networking equipment; consultancy, advisory and information services relating to the aforesaid services; consultancy, advisory and information services in the field of cloud computing networks and applications; consultancy, advisory and information services in the field of deploying cloud storage environments in the field of infrastructure as a service [IAAS]; consultancy, advisory and information services in the field of deploying cloud computing environments in the field of infrastructure as a service [IAAS]; consultancy and research in the field of quantum algorithms; consultancy and research in the field of quantum computing; artificial intelligence consultancy; computer technology consultation in the field of machine learning and artificial intelligence; technical consulting in the field of artificial intelligence.
